Full stack web developer using knowledge of game development to create mobile first environments largely focused on UI/UX. Recently earned a certificate in full stack development from Carleton University, developing skills in Javascript, CSS, API's and responsive web design. With each new project I strive to write clean understandable code while focusing on creating a good UX. I look forward to applying my skills to a quality-driven team to create engaging and memorable experiences on the web.

TECHNICAL SKILLS

Languages: JavaScript ES6+, CSS3, HTML5
Applications: GitHub, Microsoft Office
Tools: JQuery, Bootstrap(and like tools)
